Capsela®

Capsela is the motorized construction toy of the hi tech 80's. With its unique system of interlocking gears and capsules which go together in a snap you can build an unlimited variety of land, water and even "air" action toys like a fire boat that shoots water or a cable car that flies on a string or a vacuum cleaner that really works and even a moving robot.

Capsela was designed to be totally interchangeable with Spacelink. By combining all the parts you can create an endless variety of space environments, including fully motorized spaceships and accessories.

So come aboard, enter the world of Capsela and Spacelink.

PRINTED IN HONG KONG

SPACELINK™

Now you can explore the cosmos with Spacelink the action powered futuristic assembly toy. There are 61 Spacelink parts that fit together in a snap to build exciting space crafts and lofty space stations. Each set comes with a poseable Capsenaut play figure and a work station module. Spacelink vehicles are powered by a pull-back thruster so you never need batteries to propel your space toy.

All Spacelink parts are interchangeable with Capsela. That means you can motorize your Spacelink vehicles and build an unlimited variety of action toys that run in the air, in water and on land.

So come aboard, enter the world of Spacelink and Capsela.
